

DID YOU KNOW?

A decline in water quality could mean a loss of nearly 400 jobs in the Lakes Region, more than anywhere else in NH.

(Source: NH Lakes Study, 2007)

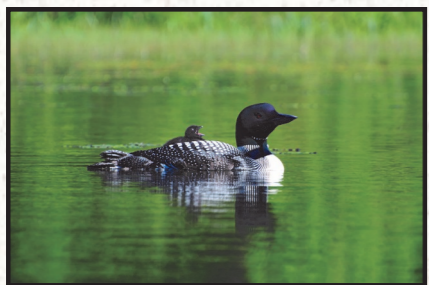

Property values...

Tourism...

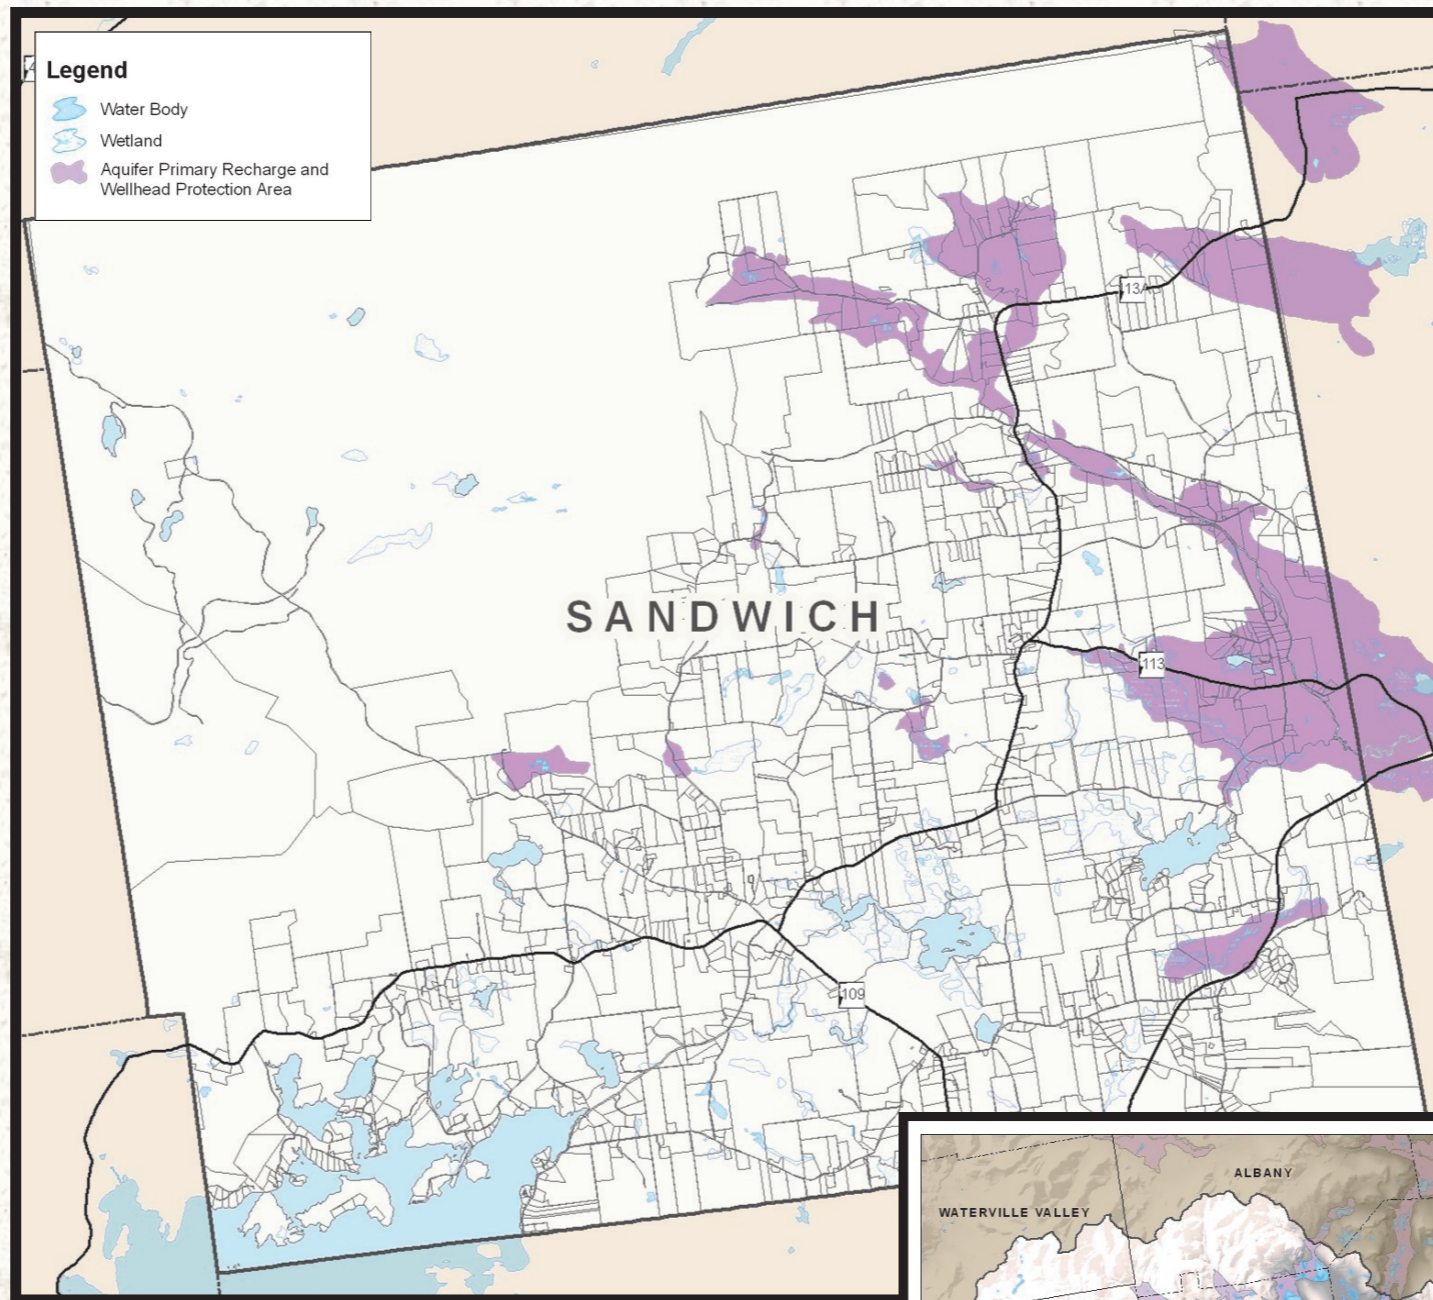

Recreation...

Wildlife...
...all depend upon clean water.

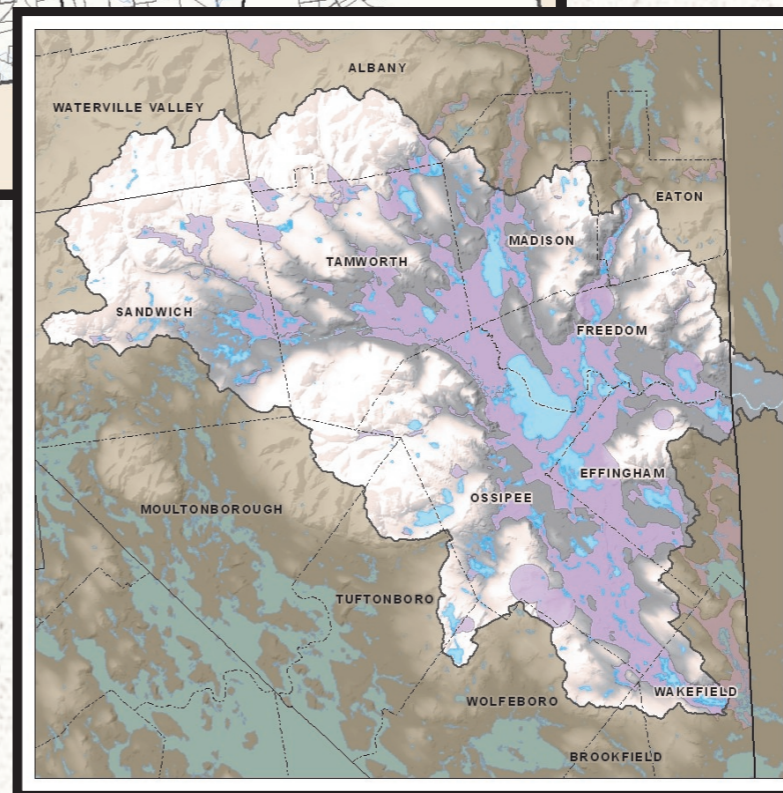

Sandwich is part of the Ossipee Watershed & Ossipee River Aquifer

Home of New England's largest stratified drift aquifer.

Please help and support efforts to protect water in your town.

Maps created by Lakes Region Planning Commission of geohydrology and water quality of stratified-drift aquifers in the Saco and Ossipee River basins, East-Central New Hampshire, USGS Water-Resources Investigations Report 94-4182.
